

Analisis Efektivitas Program Makan Bergizi Gratis (MBG)

National Social & Fiscal Intelligence Assessment 2024–2026

Disusun oleh: Andhika Tubagus Dinata, S.Kom., MTCNA

Jakarta, Oktober 2025

Daftar Isi / Table of Contents

Daftar Isi / Table of Contents	2
BAB I – Executive Summary / Ringkasan Eksekutif	3
BAB II – Introduction / Pendahuluan	4
BAB III – Data Analysis & Findings / Analisis Data & Temuan	4
BAB IV – Quantitative Scenario Modelling / Pemodelan Kuantitatif	5
BAB V – Key Challenges & Implementation Risks / Tantangan & Risiko Implementasi	6
BAB VI – Conclusions & Recommendations / Kesimpulan & Rekomendasi	7
BAB VII – OSINT References / Referensi OSINT	7

BAB I – Executive Summary / Ringkasan Eksekutif

****Latar Strategis**** — Program Makan Bergizi Gratis (MBG) adalah inisiatif nasional prioritas 2024–2029 untuk menekan malnutrisi, meningkatkan fokus belajar, dan menggerakkan UMKM pangan lokal.

****Capaian Awal**** — Per pertengahan 2025, ±5,5 juta penerima di 26 provinsi. Target 2025: 22,7 juta; ekspansi penuh 2026 mencakup >50 juta anak & kelompok rentan.

****Efektivitas Awal**** — Indikasi penurunan stunting 7–8%, kehadiran sekolah +11–12%, dampak ekonomi lokal positif. Data masih indikatif dan butuh evaluasi panel jangka panjang.

****Tantangan Kritis**** — Logistik daerah terpencil, standar kualitas bahan, insiden keamanan pangan, ketepatan sasaran, dan tekanan fiskal.

****Kesimpulan Eksekutif**** — Efektivitas menjanjikan namun belum konklusif; perlu penguatan quality control, audit berbasis hasil, dan rencana exit.

****Strategic Context**** — The Free Nutritious Meal (MBG) Program is a 2024–2029 flagship to reduce malnutrition, improve learning focus, and stimulate local food MSMEs.

****Initial Achievements**** — By mid- 2025: ~5.5M beneficiaries across 26 provinces. 2025 target: 22.7M; full- scale 2026: >50M children & vulnerable groups.

****Early Effectiveness**** — Signals of 7–8% stunting reduction, +11–12% school attendance, and positive local- economy effects. Evidence is indicative; longitudinal panel evaluation is required.

****Critical Challenges**** — Remote- area logistics, uneven food quality standards, food- safety incidents, targeting accuracy, and fiscal pressure.

****Executive Conclusion**** — Promising yet inconclusive; strengthen quality control, results- based audits, and an exit plan.

BAB II – Introduction / Pendahuluan

****Latar Belakang**** — SSGI 2024 menunjukkan stunting nasional 19,8%. Anemia remaja putri >16% mengganggu produktivitas.

****Mandat Nasional**** — Agenda Prioritas Presiden & RPJMN; pendanaan kolaboratif APBN–APBD lintas kementerian.

****Tujuan Kajian**** — Menilai efektivitas sosial, gizi, dan fiskal MBG 2024–2026 dengan pendekatan intelijen kebijakan publik.

****Metodologi**** — (1) Analisis deskriptif gizi; (2) Pemodelan biaya- efektivitas; (3) Analisis risiko implementasi; (4) Rekomendasi strategis.

****Struktur Laporan**** — Tujuh bab: Executive Summary, Introduction, Data Analysis & Findings, Quantitative Modelling, Key Challenges & Risks, Conclusions & Recommendations, OSINT References.

****Background**** — SSGI 2024 reports national stunting at 19.8%. Adolescent female anemia >16% undermines productivity.

****National Mandate**** — Presidential Priority & RPJMN; collaborative APBN–APBD funding across ministries.

****Purpose**** — Assess MBG’s social, nutritional, and fiscal effectiveness (2024–2026) using a public- policy intelligence lens.

****Methodology**** — (1) Descriptive nutrition analysis; (2) Cost- effectiveness modelling; (3) Implementation risk analysis; (4) Strategic recommendations.

****Report Structure**** — Seven chapters: Executive Summary, Introduction, Data Analysis & Findings, Quantitative Modelling, Key Challenges & Risks, Conclusions & Recommendations, OSINT References.

BAB III – Data Analysis & Findings / Analisis Data & Temuan

****3.1 Status Gizi Nasional (2024–2025)**** — Stunting 19,8% (SSGI 2024), menurun dari 21,6% (2022) dengan ketimpangan barat- timur; beberapa provinsi >30%.

****Anemia Remaja**** — ~16,2% pada remaja putri (Riskesdas 2023), berdampak pada konsentrasi belajar.

****3.2 Distribusi Penerima**** — ±5,5 juta penerima di 26 provinsi; konsentrasi di Jabar, Jateng, Sumut; wilayah timur

****3.1 National Nutrition (2024–2025)**** — Stunting 19.8% (SSGI 2024), down from 21.6% (2022) with west- east disparities; several provinces >30%.

****Adolescent Anemia**** — ~16.2% among girls (Riskesdas 2023), impacting learning concentration.

****3.2 Beneficiary Distribution**** — ~5.5M across 26 provinces; concentrated in West/Central Java and North Sumatra;

masih pilot.

****3.3 Serapan Anggaran**** — Per Agustus 2025 sekitar 42% dari pagu Rp71T; kendala kontrak, disparitas harga pangan, dan logistik.

****3.4 Dampak Awal**** — Kehadiran +11–12%; skor konsentrasi +15% (observasi guru); >23.000 UMKM terlibat.

****3.5 Isu Kritis**** — Insiden keamanan pangan (Mei 2025); validasi data sasaran: ~8% tidak memenuhi kriteria.

****3.6 Ringkasan**** — Efektivitas awal positif namun belum stabil; perlu governance & QA yang konsisten.

eastern regions in pilots.

****3.3 Budget Absorption**** — ~42% of Rp71T by Aug- 2025; bottlenecks: contracting, food- price disparities, logistics.

****3.4 Early Impacts**** — Attendance +11–12%; concentration +15% (teacher observation); >23,000 MSMEs engaged.

****3.5 Critical Issues**** — Food- safety incidents (May- 2025); targeting validation: ~8% ineligible.

****3.6 Summary**** — Early outcomes positive but unstable; consistent governance & QA needed.

BAB IV – Quantitative Scenario Modelling / Pemodelan Kuantitatif

****4.1 Pendekatan & Asumsi**** — Harga Rp10k/Rp15k, frekuensi 1×/3×/5× per minggu, 40 minggu/tahun; cakupan 5,5M/22,7M/52,9M.

****4.2 Biaya Total**** — Rp15k·5×·40 → Rp3.000.000/anak/tahun; 22,7M anak ≈ Rp68,1T (mendekati pagu 2025). Cakupan penuh 52,9M → ≈ Rp158,7T.

****4.3 Sensitivitas**** — Rp10k·3× → ≈ Rp40,9T nasional, namun kualitas gizi turun.

****4.4 Efektivitas Fiskal**** — Indikasi kasar: ~Rp9T per 1% penurunan stunting (asumsi tata kelola optimal).

****4.5 Ketimpangan Regional**** — Biaya wilayah kepulauan/pegunungan bisa ±25% lebih tinggi.

****4.1 Approach & Assumptions**** — Prices Rp10k/Rp15k, frequencies 1×/3×/5× weekly, 40 weeks/year; coverage 5.5M/22.7M/52.9M.

****4.2 Total Costs**** — Rp15k·5×·40 → Rp3,000,000/child/year; 22.7M children ≈ Rp68.1T (near 2025 ceiling). Full coverage 52.9M → ≈ Rp158.7T.

****4.3 Sensitivity**** — Rp10k·3× → ≈ Rp40.9T nationally, with potential nutrition- quality trade- offs.

****4.4 Fiscal Effectiveness**** — Roughly ~Rp9T per 1% stunting reduction (assuming optimal governance).

****4.5 Regional Inequality**** — Island/highland costs ±25% higher.

****4.7 Implikasi**** — Kisaran berkelanjutan Rp60–70T/tahun jika efisiensi logistik & QA kuat; kalibrasi co- funding daerah.

****4.7 Implications**** — Sustainable range Rp60–70T/year if logistics efficiency & QA remain strong; calibrate regional co- funding.

BAB V – Key Challenges & Implementation Risks / Tantangan & Risiko Implementasi

****5.1 Tata Kelola**** — Koordinasi lintas kementerian memicu inefisiensi & jeda eksekusi.

****5.1 Governance**** — Inter- ministerial coordination causes inefficiencies and execution lags.

****5.2 Keamanan Pangan**** — Inspeksi dapur, rantai dingin, dan pelatihan higienitas perlu diperkuat.

****5.2 Food Safety**** — Strengthen kitchen inspections, cold- chain, and hygiene training.

****5.3 Ketepatan Sasaran**** — Tanpa single registry, tumpang tindih dengan bansos lain; ~8–10% tidak memenuhi kriteria.

****5.3 Targeting**** — Without a single registry, overlap with other social aids; ~8–10% ineligible.

****5.4 Logistik**** — Biaya transport wilayah kepulauan bisa hingga +40%; keterbatasan cold storage.

****5.4 Logistics**** — Island transport costs up to +40%; limited cold storage.

****5.5 Risiko Politik**** — Simbol program andalan; persepsi publik berdampak pada legitimasi.

****5.5 Political Risk**** — Flagship symbolism; public perception affects legitimacy.

****5.6 Fiskal**** — Kebutuhan Rp~70T/tahun menekan ruang fiskal sektor lain bila efisiensi rendah.

****5.6 Fiscal**** — ~Rp70T/year needs can squeeze fiscal space if efficiency is low.

BAB VI – Conclusions & Recommendations / Kesimpulan & Rekomendasi

****6.1 Kesimpulan**** — MBG berpotensi signifikan, namun efektivitas belum konklusif karena bottleneck koordinasi, logistik, dan pengawasan.

****6.2 Kinerja**** — Indikasi stunting ↓7–8%, kehadiran ↑12%, UMKM >23.000; dampak jangka panjang butuh pemantauan 3–5 tahun.

****6.3 Efisiensi Fiskal**** — Rentang berkelanjutan Rp60–70T/tahun; ~Rp9T per 1% stunting.

****6.4 Rekomendasi**** — (1) Audit acak food safety; (2) Single registry berbasis NIK; (3) Insentif kinerja UMKM; (4) Dashboard publik real- time; (5) Integrasikan TTD & edukasi gizi remaja.

****6.5 Outlook 2026–2030**** — Reformasi kebijakan sosial berbasis gizi, dengan pengawasan digital dan penganggaran berbasis kinerja.

****6.1 Conclusions**** — Significant potential, yet effectiveness remains inconclusive due to coordination, logistics, and oversight gaps.

****6.2 Performance**** — Signals: stunting ↓7–8%, attendance ↑12%, >23,000 MSMEs; long- term impact needs 3–5 years monitoring.

****6.3 Fiscal Efficiency**** — Sustainable range Rp60–70T/year; ~Rp9T per 1% stunting.

****6.4 Recommendations**** — (1) Random food- safety audits; (2) NIK- based single registry; (3) Performance incentives for MSMEs; (4) Real- time public dashboard; (5) Integrate iron supplements & adolescent nutrition education.

****6.5 Outlook 2026–2030**** — Nutrition- centric social policy reform with digital oversight and performance- based budgeting.

BAB VII – OSINT References / Referensi OSINT

****Referensi OSINT (ringkas)**** — Kemenkes (SSGI 2024); Riskesdas 2023; Kemenkeu/BKF (serapan 2025); INDEF (efek pengganda MBG 2024); CISDI (kajian implementasi 2025); Katadata & Tempo (pembaruan realisasi 2025); BPS (statistik pendidikan & kesehatan 2024); CIPS (analisis tantangan MBG).

****OSINT References (concise)**** — MoH (SSGI 2024); Riskesdas 2023; MoF/FPA (2025 absorption); INDEF (MBG multiplier 2024); CISDI (implementation review 2025); Katadata & Tempo (2025 updates); BPS (education & health stats 2024); CIPS (MBG challenge analysis).
